## **D. LEARNING OUTCOMES (General)**

05/20/2024 07:02 AM Version 3.1.4 Page 2 of 4

- 1. Advocate for the health needs of clients, patients, communities, and populations.
- 2. Practice in collaboration with other health care and wellness professionals.
- 3. Provide athletic training services in a manner that uses evidence to inform practice.
- 4. Practice in a manner that is congruent with the ethical standards of the profession.
- 5. Practice health care in a manner that is compliant with the BOC Standards of Professional Practice and applicable institutional/organizational, local, state, and federal laws, regulations, rules, and guidelines. Applicable laws and regulations include (but are not limited to) the following:
  - -Requirements for physician direction & collaboration
  - -Mandatory reporting obligations
  - -Health Insurance Portability and Accountability Act (HIPAA)
  - -Family Education Rights and Privacy Act (FERPA)
  - -Universal Precautions/OSHA Bloodborne Pathogen Standards
  - -Regulations pertaining to OTC/Presciption meds
- 6. Advocate for the profession.
- 7. Develop a care plan for each patient. The care plan includes (but is not limited to) the following:
  - -Assessment of the patient on an ongoing basis and adjustment of care accordingly
  - -Collection, analysis, and use of patient-reported and clinician-rated outcome measures to improve patient care
  - -Consideration of the patient's goals and level of function in treatment decisions
  - -Discharge of the patient when goals are met or the patient is no longer making progress
  - -Referral when warranted
- 8. Evaluate and manage patients with acute conditions, including triaging conditions that are life threatening or otherwise emergent.
- 9. Perform an examination to formulate a diagnosis and plan of care for patients with health conditions commonly seen in athletic training practice.
- 10. Perform or obtain the necessary and appropriate diagnostic or laboratory tests including (but not limited to) imaging, blood work, urinalysis, and electrocardiogram to facilitate diagnosis, referral, and treatment planning.
- 11. Select and incorporate interventions (for pre-op patients, post-op patients, and patients with nonsurgical conditions) that align with the care plan. Interventions include (but are not limited to) the following:
  - -Therapeutic and corrective exercise
  - -Joint mobilization and manipulation
  - -Soft tissue techniques
  - -Movement training (including gait training)
  - -Motor control/proprioceptive activities
  - -Task-specific functional training
  - -Therapeutic modalities
  - -Home care management
  - -Cardiovascular training
- 12. Educate patients regarding appropriate pharmacological agents for the management of their condition, including indications, contraindications, dosing, interactions, and adverse reactions.
- 13. Administer medications or other therapeutic agents by the appropriate route of administration upon the order of a physician or other provider with legal prescribing authority.
- 14. Evaluate and treat a patient who has sustained a concussion or other brain injury, with consideration of established guidelines.
- 15. Develop and implement specific policies and procedures for individuals who have sustained concussions or other brain injuries, including the following:
  - -Education of all stakeholders
  - -Recognition, appraisal, and mitigation of risk factors
  - -Selection and interpretation of baseline testing
  - -Agreement on protocols to be followed, including immediate management, referral, and progressive return to activities of daily living, including school, sport, occupation, and recreation
