

Listed below are some of the CMC resources useful for teaching preschool through grade 12.

- **Juvenile Literature/Trade Books:** Collection of books for toddlers through young adults in three areas: easy books, fiction, and non-fiction.
  - **Easy Books:** Picture books are generally 32 pages long. Illustrations are as important (or even more important) as the words in telling a story. These are imaginative stories that are “not true.” Also included are concept books, such as alphabet books and counting books. Most picture books are for younger children, toddlers to about grade three. However, some titles are on sophisticated topics and are appropriate for upper elementary and middle school.
  - **Fiction:** These are imaginative stories or chapter books for children from about age eight through high school age.
  - **Non-fiction/Information books:** Factual books for children and teens. The Dewey Decimal classification 000-999 also includes folklore and poetry.
- **K-12 Textbooks:** Books used in schools for the formal study of a subject. The CMC collection includes textbooks for subjects taught from kindergarten through high school.
- **Curriculum Bulletins:** Teaching activity books which have numerous ideas for lesson plans.
- **Multimedia Materials:** Non-book materials appropriate for preschool through high school including DVDs, videos, kits, games, flash cards, music CDs, puppets, models, audiobooks, and realia. Realia are real objects to be used for hands-on experience in teaching.
